

## **Music therapy**

*Dolginin Antony Olegovich, Tsinsky Yaroslav Andreevych*

*Belarusian State Medical University, Minsk*

*Tutor(s) – Prostotina Olga Valerievna, Belarusian State Medical University, Minsk*

Music therapy is a psychotherapeutic method, using music as remedy. This unconventional method is actively developing nowadays.

We would like to generalize the music therapy current data and get acquainted those who are interested in the given topic.

We used different works of current music therapists in our work.

It was confirmed, that, sometimes, music therapy may be used as an excellent alternative to the traditional medicine.

Sometimes, music therapy may be used as an excellent alternative to the traditional medicine.
