**FEATURES OF MANAGING MEDICAL CONSEQUENCES IN EMERGENCY
SITUATIONS AND MASS CASUALTY INCIDENTS IN ISRAEL**

Scientific supervisor PhD, associate professor, colonel of m/s Sokolov Yu. A.

*Department of Military Health Maintenance Organization and Emergency Medicine
Belarusian State Medical University, Minsk*

Relevance. In case of wars or environmental catastrophes in Israel, there are proper protocols for handling and solving the consequences of those extreme situation in many aspects as: proper taking care of the injured and the dead and providing them proper medical care, aspects of securing the area and rescuing the trapped by civil or military organizations.

Aim: analyze and summarize information regarding the proper handling of wars or environmental catastrophes in Israel in medical aspects.

Materials and Methods. The open sources of the internet and scientific military Israeli articles were used to collect information about health maintenance organization and emergency medicine in case of wars or environmental catastrophes in Israel.

Results. The integration of different forces: Military force for areal operational defending, and civil organizations, evacuation injured by air, sea and land combined with medical crews which give new medical evacuation policies are expediting soldiers and citizens to treatment facilities faster and in better medical condition.

Conclusions. 1. Medical crews tasked with medical treatment of injured in humanitarian approaches by *Geneva Convention* laws to allies or foe. 2. Following procedures of correct severity assessment, communication with force extensions in civil and army hospitals. 3. Choosing the proper medical crews are critical for missions of bringing advanced and specialized medical knowledge and experience to the injured, both in the field and in the air on the way to the hospital. 4. Keeping the *Golden hour* is the main goal of the related medical forces, and any of the actions of the civil and military forces should be in this favor.
